Millage

HEADQUARTERED IN LOS ANGELES SINCE 1997, Millage manufactures fine men's and women's wristwatches in its own factories in Europe that combine functionality with elegance. Founded in 1867 by Millage Massih and still operated by the Massih family today, they offer more than 100 styles in 18-karat gold, platinum, stainless steel, and high-tech aluminum, as well as 80 different dial colors, available across a wide range of price points.

The Millage Tourbillion collection is composed of delightfully sophisticated pieces, providing customers with a variety of subtle color choices, from the classic starkness of White On Silver to the soft tones of Brown On Rose. Each piece features

a scratch resistant, antireflective sapphire crystal and solid stainless steel case, accompanied by a 22 MM genuine coroco calf leather bracelet. An exhibition back reveals the decorative, automatic open heart tourbillion movement. Expressing the movement's complications is a day subdial near 9:00, a second subdial near 3:00, a window near 11:00 that shows the year, and a window near 1:00 that shows the month. These pieces, which are modern in their design while embracing Millage's classic appeal, are water resistant up to 150 feet and offer a seven-year limited warranty.

This sophisticated Tourbillion collection reflects the 142-year-old tradition of the elegant and unique design and quality of Millage timepieces, which can be purchased online (www.millage.com) or at authorized dealers nationwide. ●
